DETAILED ACTION

Election/Restrictions

- 1) Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-5, drawn to a plasma-assisted deposition method.

Group 2, claim(s) 9-12, drawn to a plasma-assisted deposition apparatus.

- 2) The inventions listed as Groups 1 and 2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:
- a) JP 2001-345312 (Cl. 6-7, PG 2, 15-25, 87-89, 151,166, Fig. 13-15) teaches a plasma film formation method which forms a fluorocarbon film, using operating parameters of 3eV or less electron temperature, 10^{12} electrons/cm³ or more, and a pressure of 2.7 Pa.
 - b) JP 2002-220668 (Cl. 5, PG 19 and 22) and JP11-162960 (Cl. 1-7, PG 21-39) teach that C₅F₈ is a known source gas for forming fluorocarbon films by plasma film formation methods.
 - c) US Patent 6,220,204 (Column 4 Lines 51-59) teach that it is known to generate plasmas by arc discharge with temperatures of 2-100 eV and electron densities of 10^{10} - 10^{13} electrons/cm³, which are both within the claimed ranges, and teaches that this range gives a vaporizable and highly ionizable material, which is useful in deposition processes.
 - d) At this point, the claimed parameters and the claimed materials are present in both the application and the prior art. The same material processed under the same parameters must result in the claimed product for both the claimed invention and the prior art.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1792

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

3) Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
